Whiteness Meter MBZ-2

The Zaccaria Whiteness Meter model MBZ-2, is the new version of the MBZ-1 meter, which is already known in the market and used for production quality control and the standardization of the level of whitening during the milling process. By measuring the grain whiteness, transparency and polishing. It is a basic and an essential piece of equipment for the rice millings.

More modern and compact, the MBZ-2 brings some innovations about rice process control and standardization laboratories. Among them, they are:

- Equipment set-up and operation by a touch screen display
- It allows more set-up and diagnosis options
- Calculation of average using up to 10 consecutive measurements and is capable of storage of more than 1000 measurements or identified averages per sampling point into its memory
- It has an internal clock which allows to save the sample measurements on time
- It has a PC communication interface to transfer the memory stored measurements to generate reports

FEATURES

- 4.3" LCD touch screen display
- Storage memory up to 1024 measurements
- PC communication interface
- PC data transfer software
- Whiteness, transparency and polishing level measurement

**Items included in the package:**

- MBZ-2 whiteness meter
- MBZ-2 plastic cover
- Sample carrier case
- Sample carrier (2)
- Calibration standards (2) with case
- PC communication cable
- Power source
