Portable Whiteness Meter MBZ-P

The Zaccaria Portable Whiteness Meter model MBZ-P, was specially developed to make the rice processing control and standardization easier, providing much more agility to the currently utilized method. Nowadays, Whiteness Meter are installed on a fixed location and samples have to be brought to them to be measured. In such process, depending on the distance and the number of sampling points, the time to the adjustment increases considerably, compromising the standardization and quality of the final product.

The MBZ-P is a tool that the operator can carry wherever he goes. Using the MBZ-P, the whiteness measurement is done directly at the sampling point and, if required, the operator can make the adjustments immediately, saving time and assuring the quality of the final product.

To make it even better, the MBZ-P calculates the average up to 10 consecutive measurements, and it can store more than 1000 measurements of identified averages into its memory for later be transferred to a PC to generate reports. It works with an internal rechargeable battery, features a 2.8" touchscreen LCD display, and it is supplied with a shoulder-strapped case for protection and transportation.

FEATURES

- 2.8" LCD touchscreen display
- Memory for storing up to 1024 measurements
- 3.6v internal rechargeable battery
- PC communication interface
- PC data transfer software

**Items included in the package:**

- MBZ-P portable whiteness meter
- Two Calibration standards with case
- Shoulder-strapped case
- Battery charger
- PC communications cable
