Compact Rice Milling System ZX-6 (with optional accessories)

This unit consists of a combination of machines suitable for small rice producers who need to add more value to the product. It is also suitable for those who need a small production capacity machine or to replace an existing unit.

The compact ZX-6 unit with all or some optional accessories including electric or diesel power provides great advantages while this machine consumes very little space, is simple and pre-engineered (ready to assemble) offers easy operation and maintenance, with low power consumption. The system is capable of producing excellent quality final product, including separating by length and surface finishing of milled rice.
